## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Keith (US Pub. No. 2001/0051909).

#### ***Regarding claim 1:***

Keith teaches a support matrix for communication, wherein the matrix is at least four-dimensional, each matrix dimension includes at least one selection list, and the selection lists include at least a first initiator list, a second market segment list, a third product list, and a fourth trading scenario list. (see ¶ 43-46, and ¶ 57-58).

#### ***Regarding claim 2:***

Keith teaches the matrix according to claim 1, characterized in that each selection list includes a number of elements, which can be individually marked for selection or unselection, where each marking of one of the elements can preferably be stored and/or recalled. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 3:***

Keith teaches the matrix according to claim 1 or 2, characterized in that each element is scalable. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 4:***

Keith The matrix according to one of the preceding claims, characterized in that the elements of the initiator list can be used to select at least between buyer and/or seller. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 5:***

Keith teaches the matrix according to one of the preceding claims, characterized in that the elements of the market segment list can be used to select at least one market segment. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 6:***

Keith teaches the matrix according to one of the preceding claims, characterized in that the elements of the product list can be used to select at least one product group and/or a product. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 7:***

Keith teaches the matrix according to one of the preceding claims, characterized in that the elements of the trading scenario list can be used to select at least one trading scenario. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 8:***

Keith teaches the matrix according to one of the preceding claims, characterized by

Art Unit: 3694

means of at least one services list, the elements of which can be used to select a service provider. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 9:***

Keith teaches the matrix according to claim 8, characterized in that the service provider to be selected can be a liquidating company, a transportation company, a logistics company, a filling company, a packing company, a bank, an insurance company, a laboratory, and/or the like. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 10:***

Keith teaches the matrix according to claim 8 or 9, characterized in that the services list can be selected by means of the trading scenario list or represents a fifth dimension of the matrix. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 11:***

Keith teaches the matrix according to one of the preceding claims, characterized by means of at least one company list. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 12:***

Keith teaches the matrix according to one of the preceding claims, characterized by means of at least one product specifications list, the elements of which can be used to select product specifications. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 13:***

Keith teaches the matrix according to claim 12, characterized in that the product specifications list can be selected by means of the product list. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 14:***

Keith teaches a method for operating a trading center using a matrix according to one of the preceding claims, characterized in that the matrix is prepared by an operator, the matrix is called up by an initiator, preferably via the Internet, the called matrix is processed by the initiator, preferably at the initiator's workstation, the processed matrix is sent to the operator, preferably via the Internet, and the sent matrix is processed by the operator. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 15:***

Keith teaches the method according to claim 14, characterized in that the operator includes an Internet platform operator and/or at least a service provider. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 16:***

Keith teaches the method according to claim 14 or 15, characterized in that at least a first element of the selection lists is selected by the initiator, at least a second element of the selection lists is unselected by the initiator, and/or at least a third element of the selection lists is not processed by the initiator, where the trade is routed to the first element by the operator, the trade is not routed to the second element by the operator, and/or the third element is incorporated into the trade. (see ¶ 43-46, and ¶ 57-58).

***Regarding claim 17:***

Keith teaches the method according to claim 14 or 15, characterized in that the operator deliberately preserves the anonymity of the initiator. (see ¶ 43-46, and ¶ 57-58).
